

EPONA

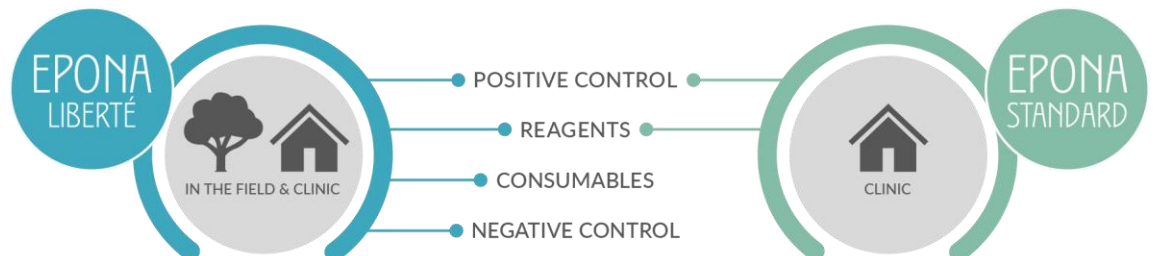

ACUTE RESPIRATORY SYNDROME

The equine **ACUTE RESPIRATORY SYNDROME** refers to a complex set of symptoms that are often numerous and not very specific, such as hyperthermia, **serous nasal discharge**, or inflammation of the upper respiratory tract. These symptoms may derive from infectious and contagious diseases caused either by **viruses** such as EHV-1, EHV-4 and equine influenza virus, or by **bacteria** such as *Streptococcus equi* subspecies *equi*.

The **Epona** tests for respiratory diseases are next generation molecular POC tests, allowing the detection and discrimination of fragments of the genomes of the EHV-1, EHV-4, equine influenza viruses and/or of *Streptococcus equi* subspecies *equi* in a reliable and rapid manner in order to obtain indications as to the pathogen(s) that are involved in the appearance of the observed symptoms. Unlike traditional PCR tests, **Epona** tests are performed in **a few steps only** and use a portable and easy-to-use reading instrument. The result can be obtained in less than **30 minutes**, at the clinic or on the go depending on the type of test that is chosen.

Two product ranges of **Epona** tests are available: the Epona **Liberté** product range and the Epona **Standard** product range. Each test is presented in the form of an individual pouch with the possibility of testing up to four of the microorganisms responsible for respiratory disorders.

Innovative

Identify equine infectious diseases **at your clinic or directly in the field**

Easy

Proceed with the **analysis yourself** and get immediate results

Rapid

Simple and efficient, reliable results in less than **30 minutes!**

REFERENCE	PRODUCT NAME	TESTS PER BOX	NOTE
70-1.20-S	Epona Liberté Streptococcus equi	5	Detection of <i>Streptococcus equi</i> subspecies <i>equi</i>
75-1.20-S	Epona Standard Streptococcus equi	5	
70-1.21-I	Epona Liberté Influenza Equine	5	Detection of equine influenza virus
75-1.21-I	Epona Standard Influenza Equine	5	
70-1.22-H	Epona Liberté EHV-1	5	Detection of EHV-1
75-1.22-H	Epona Standard EHV-1	5	
70-1.23-H	Epona Liberté EHV-4	5	Detection of EHV-4
75-1.23-H	Epona Standard EHV-4	5	
70-2.20-HH	Epona Liberté Panel EHV-1 & 4	5	Detection and discrimination of EHV-1 and EHV-4
75-2.20-HH	Epona Standard Panel EHV-1 & 4	5	
70-3.20-HHI	Epona Liberté Panel EHV-1 & 4 Influenza Equine	5	Detection and discrimination of EHV-1, EHV-4 and equine influenza virus
75-3.20-HHI	Epona Standard Panel EHV-1 & 4 Influenza Equine	5	
70-4.20-HHIS	Epona Liberté Panel Respiratoire	5	Detection and discrimination of EHV-1, EHV-4, equine influenza virus and <i>Streptococcus equi</i> subspecies <i>equi</i>
75-4.20-HHIS	Epona Standard Panel Respiratoire	5
